A Technology driven professional with **3.9 Years** proven experience as a Software Test Automation Engineer, in Manual and Automation testing worked with tools like Selenium

Professional Summary:

- **3.9** years experience in **manual** and **automation** testing.
- Experience in testing **Web application, Desktop applications** and achieving **high client satisfaction**.
- Extensive knowledge in **Software Development Life Cycle (SDLC)** and **Software Test Life Cycle (STLC)**.
- Extensive knowledge in **different types of Testing**: Smoke Testing, **Functional Testing**, Integration testing, System testing, Regression testing **Automation Testing**
- Developed Automation Framework with **Selenium WebDriver** using **Java** based on **Page Object Model**
- Experience in **leading** the project and **analyzing** the scope of the project and providing the **estimations**.
- Experience in **Writing, Executing & Reviewing** Test Cases.
- Good in **Defect Tracking** and **Bug Reporting**.
- Experience in **Agile (Scrum)** methodologies.
- Knowledge on writing **SQL Queries**.
- Co-ordinated with developers **to fix the issues**.
- Good communication skills & **Quick learner**.
- Having good knowledge on **Git**.

Selenium-WebDriver

- Creating automation test scripts for smoke testing and regression testing.
- Creating User Defined Function (UDF's) based on the requirement.
- Creating automation test scripts using POM Design pattern for executing the scripts.
- Experience in using Property File, Excel objects in Selenium frame work.
- Experience in Developing Automation Test Scripts, Reviewing Test Scripts based on their Requirements.
- Good experience in reviewing test scripts and finding issues in test scripts

Qualifications:

- Bachelor of Technology (EEE) in 2019 with 70%
- Diploma in Electrical and Electronics Engineering (EEE) in 2016 with 63%.

Work Experience:

- Have been working as Manual and Automation Test Engineer
 - “ Serosoft Solutions Pvt Ltd ” Since **June 2019 to April 2022**
 - “ Softtek India pvt ltd ” Since **April 2022 – April 2023**

Software Skills:

Platforms	Windows
Automation Tool	Selenium
Bug Tracking, Test Management	Jira
Programming Languages	Java
Version Control	GIT
IDE	Eclipse
Framework	Hybrid FrameWork, TestNG

Project #1 (INFO SOURCE APPLICATION)

Client : VISION Information Technology
Role : Automation Test Engineer
Duration : April 2022 – March 2023

BRIEF DESCRIPTION OF THE PROJECT:

Info source application which is a web-based software for client tracking the customer details and maintain customers data. first, we will take onecustomer name and loan number and will check the all details of customer and check the monthly transactions and daily transactions of the customer.

ROLES & RESPONSIBILITIES:

- Involved in automation scripting and execution of regression test suite along with verification of results.
- Developing, reviewing Functional and System Test cases.

- Enhancing the frame work to create new re-usable functions.
- Involved in the preparation of regression suite for Automation.
- Executing the test scripts, analyzing the results, updating the status to client.
- Logging and tracking of defects.
- Supported the other projects across same customer for building automation scripts.
- Selecting Test cases for Automation.
- Developing POM Classes.
- Preparing test data.
- Developing Test Classes.
- Analyzing Automation Results and Preparing automation execution Reports.

Project #2(ACADEMIA)

Client : Serosoft
Role : Test Engineer
Duration : July 2019 to march 2022

BRIEF DESCRIPTION OF THE PROJECT:

Academia is the complete enterprise solution for colleges & universities looking to automate their Academic and Administrative processes. This comprehensive suite streamlines complete student lifecycle from Enquiry to Graduation as well as administrative process such as Inventory , Hostel, Library, Human Resources etc.

ROLES & RESPONSIBILITIES:

- Understanding the Business Requirement Specifications.
- Designing Test Cases, Execution of the test cases and reporting the bugs using JIRA.
- Conducted Functional testing with Valid and Invalid inputs for positive and negative testing.
- Communicates with Functional Analyst on any issue clarifications.
- Converted Manual test cases to Automation script with Selenium Web driver.
- Involved in test scripts review.
- Participation of daily and weekly scrum meeting and to discuss the risks involved in ongoing projects with Teammates and Team Lead and having frequent interaction with Clients.
- Created test scripts using Web driver.
- Using the Page Object Model (POM) And creating Page Factory for all the pages.
- Executed Automation test script against the functional specifications.
- Executed Scripts on different web browsers (Chrome, Firefox and IE, Microsoft Edge).
